

Building compliance and condition assessment, optimized

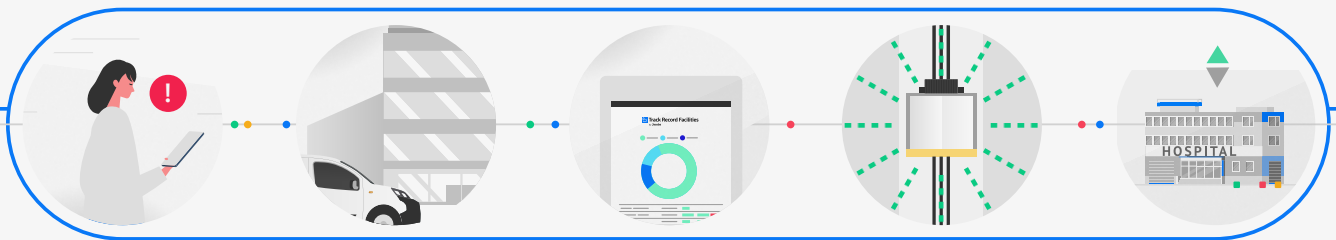

Track Record Facilities, your web-based compliance management platform. Enabling you to deliver full compliance and condition assessment with evidence audit trails, all at lower cost and risk.

Are you concerned that your compliance process is leaving you exposed to serious risk?

Digitize your workflows, interrogate real time data, reduce statutory risk and deliver portfolio value improvement.

THE TRACK RECORD APPROACH

Schedule

An alert notification highlights when inspections are due, accessible anywhere, on any device, at any time.

Inspect

On-site mobile data capture speeds up inspections and provides secure upload and access of all information, on the go.

Report

A report is automatically created, with interactive visual dashboards – keeping key stakeholders informed.

Action

Traffic light systems identify real-time progress and provide alerts, supporting fast action.

Comply

Full compliance and condition assessment delivered, with evidence audit trails of data that you own.

“ We use Track Record Facilities for statutory compliance with it helping us in the areas of maintenance and asset management. It is now **a key part of how we manage our risk and essential statutory tasks.**”

Andy Smith Technical Compliance Director at Gov Facility Services Limited

Return on investment

KEY BENEFITS

Improve efficiency

We support productivity. Speed up your inspections, securely upload and access all information, across any device, as well as gaining instant updates on the go.

Unlimited users

We encourage collaboration. With unlimited seats your price won't increase, no matter how many people use the platform.

Reduce risk

We provide peace of mind. Enabling you to prove your portfolio regulation compliance within a limited budget and without unnecessary costs.

One platform

We simplify things. Digitizing the collection, storage, analysis and reporting of your data all in one centralized place.

KEY FEATURES

Visual tracking

Our traffic light system identifies progress and provides alerts.

Instant updates

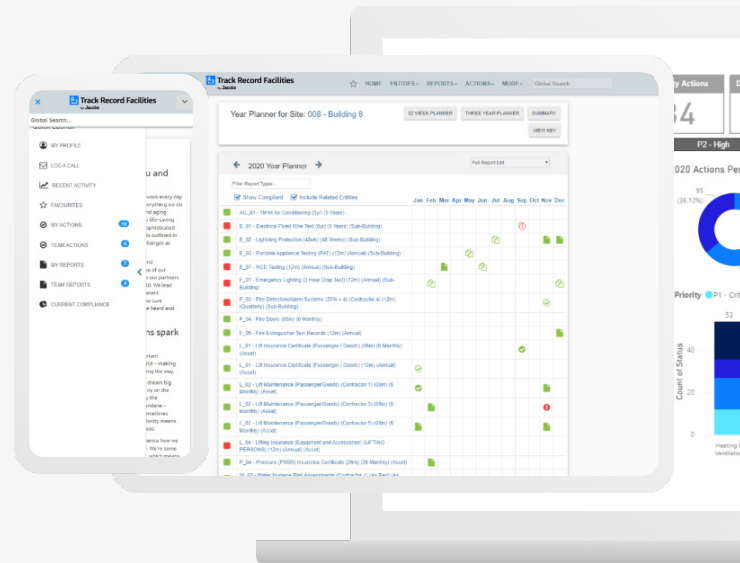

Our mobile apps allow on-site mobile data capture and provide instant updates on the go.

Interactive dashboards

Our interactive visual dashboards allow faster reporting.

Personalized experience

Our tailored landing page highlights your key tasks and priorities for immediate focus.

WE'RE TRIED AND TESTED

For almost two decades, teams have trusted Track Record software to reinvent the way they collaborate and approach data management. Continuously evolving alongside the needs of our clients, Track Record Facilities provides a highly secure, reliable and configurable solution to enable teams to digitize their workflows on one centralized and streamlined platform.
